

# GOLDEN 3K SINGLE TRACK ELEVATOR

- All of our installers inspect the lift and ground for stray electric current and correct issues before the electrolysis damages the in water parts.
- Elevators come supplied with zinc anodes to help prevent electrolysis of the I-beam track.
- We offer many support options for different boat styles and hull shapes.
- All of our assemblies are built for commercial or private use.
- Boxed track cover comes standard with Golden Sea-Drive®.
- All lifts are covered by Products Liability Insurance.
- Standard wood bunks or optional aluminum bunks.
- Optional high speed motor with Sea-Drive® option.
- Pipe structure for angles from 90 to 45 degrees.
- Optional remote control and auto stop.
- 4" Aluminum pulley with 3/4" axle.
- Adjustable guide pole bases.
- Heavy duty cradle assembly.
- Double I-Beam construction.
- All lifts are CE approved.
- Heavy duty rollers.
