DECK LIFTS

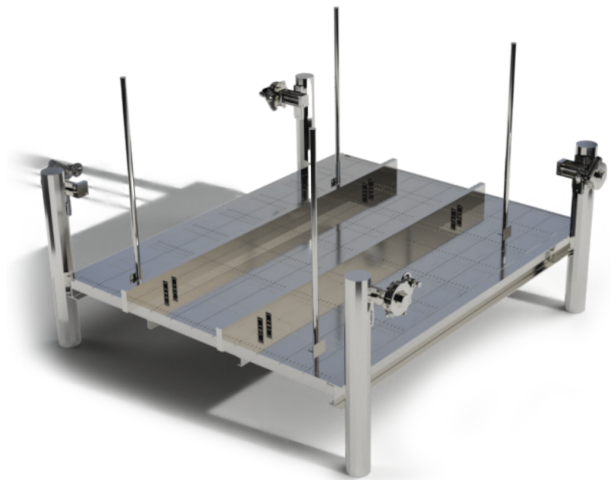

GOLDEN DECK LIFT: Versatile and Convenient

The Golden Deck Lift provides you with a convenient, attractive, and almost seamless extension to your dock and waterfront property. The low-profile versatile deck lift can be utilized in a variety of applications from lifting boats, dual jet skis, paddle boards and kayaks, or just having it as an added extension of your dock. Our deck lift gives you the ability and access to service and maintain your vessel from 360 degrees with hassle free convenience. Our Deck Lift can be integrated with every Golden lift product line. When it comes to decking, the lift can be decked with a variety of different style materials and various color options of composite decking. For the environmentally sensitive areas, we utilize an anti-slip composite grated decking which allows sunlight to still penetrate down to the sea or lake floor.

FEATURES

- Anti-slip decking
- Multiple colors and decking options
- Decks can be custom built to fit all Golden Boat Lift® capacities
- Adds convenience for complete access to your personal watercraft or boat
- Eco-friendly; does not block sunlight which allows natural sea-bottom growth
- The Sea-Drive® is warrantied for 10 years and has 8,000 inch-lbs of torque which allows us to use a 3.5" diameter vs. a 2.375" diameter

Anti-Cable Shear Plate Patent: #10,189,685
Cable Retention Bolt Patent: #6,719,241
Sea-Drive® Patent: #7,850,147
