FLOATING DOCK KAYAK LAUNCH[®]

FLOATING DOCK KAYAK LAUNCH®: Easy In and Out

Golden's innovative, patented Kayak Launch® has become one of our most popular products, endorsed by avid kayakers, HOA communities, recreational parks, and more. One of the most common requests was for a launch that could mount to a plastic floating dock without using permanent hardware or drilling holes. When our customers ask, we deliver – introducing the newly designed Floating Dock Kayak Launch®. Our design allows all of our kayak launch models to be mounted to any brand of plastic floating dock using their standard mounting connection points and hardware. Simple, effective, and unintrusive.

FEATURES

- Stainless steel self-braking winch
- Adjustable extruded aluminum bunks
- Handrails for stable entry & boarding
- 6061-T6 marine grade aluminum & 300 series stainless components
